About Me

Full-Stack Web Developer with 3+ years of experience building production-ready web platforms using Laravel, Nest.js and Next.js. Specialized in API-driven architectures, multilingual systems, and performance-optimized frontends. Focused on clean code, scalability, and translating complex business requirements into reliable technical solutions.

Skills

- **Languages:** PHP, TypeScript, JavaScript
- **Frontend:** Next.js (App Router), React, Tailwind CSS, SASS, Bootstrap, Zustand, Redux Toolkit
- **Backend:** Laravel, Nest.js, RESTful API Design, Node.js basics
- **Databases:** MySQL, PostgreSQL, SQLite
- **Tools:** TanStack Query, Axios, JWT, OAuth, Git, GitHub

Experience (freelance)

[SANAD \(Service Marketplace\)](#)

Jan 2025 - Present

- Engineered a full-stack service marketplace connecting customers with service providers through a secure, scalable platform.
- Implemented real-time messaging, Stripe payments, multilingual support, and an end-to-end booking workflow using Next.js and NestJS.
- Developed comprehensive customer, provider, and admin dashboards with integrated content management and notifications.

[Aram Gulf \(Service Center Management Platform\)](#)

Jan 2024 - Dec 2024

- Architected a full-featured service center management platform featuring automated booking, integrated payments, and real-time chat.
- Designed a multi-tenant dashboard system allowing service center owners to monitor performance statistics and manage internal workflows.
- Optimized frontend performance and state management using TanStack Query to deliver a seamless real-time user experience.

[Flick HQ \(Entertainment Discovery Platform\)](#)

May 2023 - Dec 2023

- Built a full-stack entertainment discovery platform integrating the TMDb API for personalized movie and TV show exploration.
- Implemented secure authentication with JWT and Google OAuth, subscription billing with Stripe, and real-time updates.
- Developed personalized watchlists, bilingual support, and a modern, high-performance interface using Next.js and NestJS.

[Machie \(E-commerce Platform\)](#)

Jan 2023 - Apr 2023

- Developed a responsive e-commerce platform delivering a modern online shopping experience with dynamic product browsing.
- Integrated external APIs, authentication, and client-side state management to create a smooth shopping workflow.
- Optimized responsive layouts and frontend performance using Next.js and Tailwind CSS to ensure a fast, consistent user experience.

Education

Bachelor of Arts, Zagazig University.

January 2019 - January 2023
